HARDY MUMS

Now we can have a riot of color in late summer and fall when other flowers are gone. These garden mums are very hardy, even after hard frosts the buds will open every day with a lot more flowers. We send strong, well rooted plants in May. Plant with a little water in a hole as you do tomatoes. They can be grown in garden and easily moved when ready to bloom to a better place or potted they make a nice plant to take in the house or give away and will bloom inside for a long time. Cover the plants in fall with dirt, mound up so water will not stand or they may be taken into a cold frame or kept in the basement. Divide in spring for best results. Pinching out the tops makes bushier plants and keep them low growing.
